Dear Sir/Madam,

One of our customers has applied for the domain name **www.agecvm.com**. Since you are the owner of **www.agecvm.org**, we would like to inform you about this registration request.

If our customer registers this name, this can have serious implications for your company. It may lead to confusion in Google search results because a third party is using the same name. In the worst case, this can even lead to image damage.

However, you have the option to register the domain name. As the holder of **www.agecvm.org**, you have the first registration option with us. In this way, you will avoid any problems with another company operating under the same name.

Are you interested in this option? Here are all the conditions:

- The costs for this name are CA\$29.95 per year. We will register this name for a 10-year period, which means that you pay a one-off fee of CA\$299.50;
- You can cancel this name after one year, and the costs of the remaining years will be paid back into your bank account. After cancellation, we will refund you within 10 working days;
- We need your company name and address to complete your registration. We will not accept the third applicant and will register the name for you. You can just send this data to me by e-mail

This is a non-binding proposal. You are not required to take any action, yet we do recommend that you register this name. This may avoid problems in the near future.

If you have any questions, feel free to send your questions by e-mail. If you should like to have **www.agecvm.com**, please send your company details to me by e-mail for your invoice. We will not accept the third applicant and will register the name for you.

Kind regards,

Liam Tremblay
